Twitter Bootstrap

HTML 5 + CSS 3 = Bootstrap

Job Postings
Google App Engine

OWASP
The Open Web Application Security Project

- A1-Injection
- A2-Broken Authentication and Session Management
- A3-Cross-Site Scripting (XSS)
GAE DataStore and BlobStore

A fully managed NoSQL-like data storage service that scales with your users.

Fuzzy Search Algorithm

Also known as approximate string matching

Finds strings that match a pattern approximately

"GetHub" → "GitHub"
Fuzzy Search Algorithm

Number of operations necessary to convert the string to an exact match

Insertion: $cot \rightarrow coat$

Deletion: $coat \rightarrow cot$

Substitution: $coat \rightarrow cost$
Search Scores

No Match
Perfect Match

"z"     "Knowledge"     "Tribal Knowledge"

If searching for a video titled "Tribal Knowledge"

Google Query Language

SQL-like language for retrieving entities or keys from datastore

Example queries:

GqlQuery("SELECT * FROM Videos")

GqlQuery("SELECT * FROM Videos WHERE videoID = :1", int(vid_id))

GqlQuery("SELECT * FROM Videos WHERE creator = :1 ORDER BY date DESC", user.nickname())
Selenium Testing

Selenium IDE
